## **DETAILED ACTION**

### ***Specification***

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Oath/Declaration***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1626

consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-28 are, drawn to aminostyrylanthracene compounds and methods of preparing same.

Group II, claim(s) 29-38 are, drawn to phosphonic ester or phosphonium salt compounds and processes of preparing same.

Group III, claim(s) 39-40 are, drawn to a halogenated aryl compound and process of producing same.

Art Unit: 1626

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the various processes of Groups I, II and III require different reactive steps and agents. Additionally, each group of processes are classified in different classes with a plethora of subclasses.

Illustrations of the different inventive concepts may be made by reference to the processes in the Examples of the instant application. The compounds of Groups I, II and III clearly have different technical features (i.e., aminostyrylanthracene compounds of claims 1-13 and the phosphonic ester or phosphonium salt compounds of claims 35-38) than that of the halogenated aryl derivatives of claim 39. The substituents on the anthracene compounds vary extensively and when taken as a whole result in vastly different compounds. Additionally, the vastness of the compounds and processes of preparing same imposes a substantial burden on the examination of the claimed subject matter. Applicant is required to elect a single disclosed compound and process of preparing same.

Art Unit: 1626

3. The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds and processes defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art.

4. The compounds claimed contain phosphonic esters, phosphonium salts and aminostyrylanthracene, which does not define a contribution over the prior art. The various processes and compounds vary extensively and when taken as a whole result in vastly different processes and compounds. Accordingly, unity of invention is considered to be lacking and a restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

5. A telephone call was made to David R. Metzger on 01/27/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1626

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
